RE: California Electrical Training

To Whom It May Concern:

Valley Wide Air Corporation is requesting that California Electrical Training (CET) be an approved electrical educational provider.

Valley Wide Air uses CET for training and preparation for the State Journeyman Certification.

Valley Wide Air's employees have taken several courses from CET and they have all expressed the value and how it benefited them as well as the company. As an employer we are always looking for ways to educate and provide training for our employees.

When CET makes new and different classes available we are planning on utilizing them to educate our employees as related to their scope of work. This is how we are able to provide professional, safe, and quality electricians in our company.

I am sure that other electrical contractors could and would benefit from CET programs.

If you have any questions regarding this letter please feel free to call me.

Sincerely,
Michael Mamroth
